TAPG Update

3	Respiratory System	3.1 Bronchodilators	Link to <u>BTS/SIGN guideline</u> updated. Dose information for each preparation updated to clarify whether used in asthma or COPD, or both. Link to <u>MHRA Drug Safety Update (Oct 2008)</u> on theophylline containing medicines available OTC inserted. Compound bronchodilator preparations – note added on use of nebulised salbutamol and ipratropium or combined as Combivent [®] .
		3.2 Inhaled corticosteroids	Note added on inhaled steroids in COPD. Clenil Modulite® ▼ dose information expanded to include use of Volumatic® spacer at required doses/ages. Information on use of inhaled steroids and long-acting bronchodilator in COPD expanded. Information on licensing of combined inhaled steroids and long-acting bronchodilators added.
		3.3 Cromoglycate related therapy and leukotriene receptor antagonists	Dose information for montelukast amended to be in line with manufacturers product licence. Guidance on prescribing of montelukast chewable tablets and granules added as per <u>SMC advice</u> .
		3.4 Antihistamines and allergic emergencies	Minor changes to dose information for loratadine and alimemazine.
		3.6 Oxygen	Additions to information on patients with type 1 respiratory failure and changes to wording throughout.
3	Respiratory System Guidelines	Guidance on Inhaler Devices 12 years+	Volumatic [®] removed from spacer device compatibility table for Atrovent [®] as not compatible. Inspiratory flow rates listed for use of Turbohaler [®] removed and replaced with a general statement on dry powder inhalers. <u>Spiriva ▼ Respimat[®] inhaler</u> * added as 'Other inhaled devices'.
		Emergency Management of Acute Asthma for under 12 years	Replaced with a link to Management of acute asthma in children aged over 2 years and Management of acute asthma in children under 2 years from BTS/SIGN No.101 quick reference quide (pages 15 & 16), and link to Management of acute asthma in children in general practice from BTS/SIGN No.101 full quideline (Annex 5, page 99).
		Emergency Management of Acute Asthma in Adults and Children over 12 years	Replaced with a link to the <u>BTS/SIGN No.101 quick</u> reference guide which includes chart on Management of Acute Asthma in adults (pages 13 & 14), and link to the <u>BTS/SIGN No.101 full guideline</u> (Annex 2, page 96) which includes chart on Management of acute severe asthma in adults in general practice.
		Notes on Managing Chronic Asthma	Note on higher doses of inhaled steroids possibly required in smokers/ex-smokers. Link to <u>BTS/SIGN</u> guideline updated.
		Managing Chronic Asthma in Children under 12 years	Replaced with link to Summary of stepwise management in children aged 5-12 years and in children less than 5 years from <u>BTS/SIGN No.101</u> guick reference guide (pages 10 & 11).
		Managing Chronic Asthma in Children over 12 years	Replaced with link to Summary of stepwise management in adults from <u>BTS/SIGN No.101 quick</u> reference guide (page 9).
		Chronic Obstructive Pulmonary Disease (COPD) Guidelines	Link to <u>Guidance on Smoking Cessation in Tayside</u> inserted. Further information on use of inhaled steroids in COPD added in combination with a long-acting bronchodilator. Chart on bronchodilator therapy for replaced with updated chart on pharmacological therapy.
		Anaphylaxis Guidelines	Replaced with <u>Resuscitation Council (UK) Anaphylaxis</u> <u>guidelines</u> and <u>Anaphylaxis algorithm</u> .
* 01	IC accepted medicine		

^{*} SMC accepted medicine

ACCESSING THE TAYSIDE AREA PRESCRIBING GUIDE (TAPG)

Following the introduction of the new Staffnet, please note that the Tayside Area Prescribing Guide can now be found through the undernoted pathway.

From the home page of Staffnet, click on Clinical Information which can be located on the left hand side as shown below:

Working For Us
How We Work
